Traffic Safety Engineer

Rath Building, 14th Floor

Buffalo, NY 14202

Dear Ms. Wilkolaski:

As a follow-up to our June 30, 2021 letter, we have completed our traffic engineering investigation related to the Town of Aurora's May 27, 2021 request for a speed limit reduction on Knox Road between Gypsy Lane and Town of Aurora/ Village of East Aurora line in the Town of Aurora.

The need for a reduced speed limit is based on a thorough evaluation of many factors, including roadway characteristics, roadside development, and a statistical analysis of prevailing speeds as determined by radar checks. The majority of motorists drive at a speed which they perceive to be reasonable and prudent for existing conditions. Experience has shown that if there is no apparent reason for driving at a reduced speed, the posting of signs with an arbitrarily lower speed limit does not result in voluntary compliance by the majority of drivers. Thus, the lower speed limit results in larger speed differentials which can make the road less safe.

Generally, the 85th Percentile Speed and the 10-Mile Pace are the predominant factors in determining the appropriate speed limit. The 85th Percentile Speed is that speed at or below which 85 percent of all vehicles travel. The 10-Mile Pace is that ten mile per hour speed interval that includes the greatest number of vehicles.

In the case of Knox Road, the 85th Percentile Speed was found to be 51 MPH. The 10-Mile Pace was 42-51 MPH with 77 percent of the traffic within the pace. In addition, we utilized the Federal Highway Administration's USLIMITS2 speed limit analysis software program as part of our assessment to independently determine a recommended speed limit on the basis of existing operating speeds, accident data, traffic volumes, roadside development and roadway geometry. The USLIMITS2 program output did not recommend lowering the speed limit any further on Knox Road. Considering the data that we have obtained and the USLIMITS2 output, we have determined that we will not reduce the existing 45 MPH speed limit at this time.

If you have any questions or need additional information, please contact me at (716) 847-3268 or David Sobol, of my staff, at (716) 847-3256.

Sincerely,
